

# ORTHODOX EXPLORERS CLUB - SICK & SUFFERING

Name: \_\_\_\_\_

## Match It!

- Match the immune system components to their functions

Phagocyte ● ● Produces antibodies to stop germs

B Cell ● ● Identify and destroy infected cells

Helper T Cell ● ● Digests germs by merging with lysosomes

Cytotoxic T Cell ● ● Compound that increases body temperature

Pyrogen ● ● Calls for cytotoxic T cells

## Apply It!

- Explain your immune systems first line of defense in your own words. What could you compare it to?

# ORTHODOX EXPLORERS CLUB - SICK & SUFFERING

Name: \_\_\_\_\_

Create It!

- Draw what you think each cell looks like. How do you think they move? Create a dance to go along with each picture!

**PHAGOCYTE**

A large, empty rounded rectangle with a black border, intended for drawing a phagocyte.

**B CELL**

A large, empty rounded rectangle with a black border, intended for drawing a B cell.

**HELPER T CELL**

A large, empty rounded rectangle with a black border, intended for drawing a helper T cell.

**CYTOTOXIC T CELL**

A large, empty rounded rectangle with a black border, intended for drawing a cytotoxic T cell.

Reflect On It!

- What are ways you try to feel better when your body is sick? What makes you feel better when your soul feels sick?
